## **DETAILED ACTION**

## **EXAMINER'S COMMENT**

The lengthy specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

# Allowable Subject Matter

The following is an examiner's statement of reasons for allowance: The prior art fails to disclose a deflection yoke having, inter alia, a horizontal deflection coil with a screen bent part, a neck bent part and an extension part, for changing distortion pattern on a screen corner part by extending an effective electric field length of a specific region of the extension part positioned on a diagonal direction of a front screen bent part when seen from a screen side, closely to XY plane at a back of the screen bent part (claim 4); and a method for self-correcting a pin distortion using the horizontal deflection coil comprising the steps of generating pincushion at an edge region on a screen by dividing the screen bent part of the horizontal deflection coil into quadrants, respectively, and by extending an effective electric field length at a specific region of the extension part positioned in a diagonal direction of the screen bent part on each quadrant, closely to a plane in a back of the screen bent part and correcting pincushion generated above and self inner pin phenomenon on a middle portion by compensating a whole pincushion of the screen through control of a deflection controlling circuit of a display set (claim 1). The remaining claims 2, 3, 5 and 6 are allowed by

Art Unit: 2821

virtue of their dependencies on the independent claims 1 and 4. Hence, the examiner has allowed claims 1 through 6.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

#### Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Yokota et al., Patent No. 6,380,667; Kratz et al., Patent No. 4,023,129; Gross et al., Patent No. 3,984,723; Brokar et al., Patent No. 4,143,346.

None of the above discloses the horizontal deflection coil as recited.

## Correspondence

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Haissa Philogene whose telephone number is (571) 272-1827. The examiner can normally be reached on 6:30 A.M.-6:00 P.M..

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Don Wong can be reached on (571)272-1834. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
